APRIL MILK-DELIVERY PLAN  
BELOW THAT OF MARCH

PLAN ONLY 95% COMPLETED -- Zemedelske Noviny, No 113, 14 May 49

Prague -- While there was a drop in milk delivery during the first 10 days in April, a pronounced increase took place during the last 10 days of the month. During the second 10-day period, 28,963,201 liters of milk and country butter (computed in liters) were delivered, whereas, during the third 10-day period 29,332,238 liters of milk and country butter were delivered. This was an increase of 369,037 liters, or 1.27 percent.

A total of 85,181,683 liters of milk were delivered to dairies during April, excluding the direct sale of milk to local consumers for ration tickets and including the quantity delivered over and above the quota. Adding to this the amount of country butter delivered, the grand total for April amounts to 87,485,541 liters. This means that only 94.78 percent of the April milk-delivery plan was fulfilled, while 94,592,968 liters (including country butter) were delivered in March and the plan fulfilled 100.95 percent.

Individual kraj delivered the following quantities of milk during the third 10-day period of April (in liters):
